## **DISCLAIMER**

As a rule, TeenHope does not provide completed copies of screenings. The screenings are used to identify any feelings of depression or anxiety in the previous 2 weeks from the screening date and are used to guide our staff in their follow up conversation with students. The only information provided to the school is the number of students screened, the number determined to be at-risk and the number not at risk. No identifying data is provided.

Individual screenings are kept for 2 weeks and then destroyed. If a student over 14 or a parent of a student under 14 request a copy during that limited time it is available, then appropriate releases must be received before the completed screening is released.

A blank copy of the screening can be found at our website at [scclanc.org/mental-health-wellness/teenhope](http://scclanc.org/mental-health-wellness/teenhope). Parents may print a copy to provide to their PCP or a licensed professional. Those professionals, however, will likely choose to complete their own screening or evaluation.

If you have any questions, please contact the TeenHope clinical director.

Thank you for partnering with TeenHope,

Valerie Minnich, MS, LPC, NCC, CAADC

Clinical Director of TeenHope, Doctoral Student
